How can I update my phone number in Coinbase? {Official Support}

Changing your contact

Updating your **Call+1-(805)(401)(0068)** phone number is a vital security step that ensures you continue to receive your 2-step verification codes without any problems. If you are +1-(805)(401)(0068) signed in and have access to your current 2-step verification method, you can easily change your number in the settings. Simply navigate to **Call +1-(805)(401)(0068)** your profile menu, select "Account & settings," and then find the "Phone numbers" section to add your new contact information. We always verify **Call+1-(805)(401)(0068)** your new number with a text message code to ensure that your account remains secure and that you control the line.

Browser versus app

The steps can **Call+1-(805)(401)(0068)** vary slightly between the mobile app and the web browser, but both offer an easy way to manage your contact details. On the browser, +1-(805)(401)(0068) select your profile icon, go to "Manage account," and choose to edit your phone number with just a few quick clicks. Make sure you **Call +1-(805)(401)(0068)** always use your current 2-step verification method to authorize the change, as this protects you from unauthorized account modifications today. Our support team **Call+1-(805)(401)(0068)** is here if you encounter any errors or if you need assistance during this update process for your account.

Troubleshooting and recovery

If you have **Call+1-(805)(401)(0068)** lost access to your current phone number and cannot receive 2-step codes, you must follow our formal account recovery steps. This process involves +1-(805)(401)(0068) verifying your identity through our secure platform so that we can help you regain access and update your number safely. We take your **Call +1-(805)(401)(0068)** account security very seriously, so please be prepared to provide the necessary verification information to keep your profile protected at all times. You are in **Call+1-(805)(401)(0068)** good hands, and our goal is to get your information updated as efficiently as possible so you can continue trading today.

Frequently Asked Questions (FAQs)

Q1: Can I add a backup number? A1: Yes, adding **Call+1-(805)(401)(0068)** a backup phone number is highly recommended as a secondary way to receive your essential 2-step verification codes securely. You can set +1-(805)(401)(0068) this up in your "Phone numbers" settings, providing an extra layer of access in case your primary phone is unavailable today.

Q2: What if I lost my phone? A2: If you **Call +1-(805)(401)(0068)** have lost access to your phone, please start the account recovery process immediately to verify your identity and update your details. We will guide **Call+1-(805)(401)(0068)** you through the necessary security steps to ensure your account remains safe and under your full control at all times.

Q3: Can I change from the app? A3: Yes, you +1-(805)(401)(0068) can update your phone number directly within the Coinbase mobile app by visiting your account settings and phone section. Ensure your app **Call +1-(805)(401)(0068)** is updated to the latest version to access the most convenient and user-friendly features for managing your account contact information.

Q4: Do I need verification for this? A4: Yes, we **Call+1-(805)(401)(0068)** always require 2-step verification to authorize changes to your account, ensuring that you are the one making the request. This extra step +1-(805)(401)(0068) is a crucial safety measure that helps protect your identity and prevents unauthorized parties from changing your sensitive account settings today.

Q5: Is my number private? A5: We keep **Call +1-(805)(401)(0068)** your personal contact information strictly confidential and use it only for account security and necessary communications from our team. Your data is **Call+1-(805)(401)(0068)** never shared with third parties, as we follow strict privacy policies to keep all your account information safe and secure today.
